

University Curriculum Committee Report (Meeting September 21, 2023)

Faculty Senate Meeting - November 30

Information Items: None

Old Business: None

Consent Agenda Items: All items require final approval by the Provost/SVP Academic Affairs

#	Action	Description	Implementation Date
1.	Course Title Update	<ul style="list-style-type: none">• MATH 5310 – Advanced Machine Learning I<ul style="list-style-type: none">○ This was originally a duplicate titled course and this title is being updated for accuracy and distinction from the undergraduate version of the course.	Fall 2024
2.	Course Title Update	<ul style="list-style-type: none">• STAT 5310 – Advanced Machine Learning I<ul style="list-style-type: none">○ This was originally a duplicate titled course and this title is being updated for accuracy and distinction from the undergraduate version of the course.	Fall 2024
3.	Course Number Update	<ul style="list-style-type: none">• MATH 1430 – Statistics and Probability for K-8 Teachers<ul style="list-style-type: none">○ Updating the course number from 1550 to 1430 to alleviate confusion that it is a more difficult version of MATH 1530 (Elements of Statistics). This would also better distinguish the course as part of the MATH 1410 (Structures of Mathematical Systems I) and MATH 1420 (Structures of Mathematical Systems II) group.	Fall 2024
4.	Course Rubric Update	<ul style="list-style-type: none">• UNIV 1000 – University Success<ul style="list-style-type: none">○ Updating the course rubric from APSU to UNIV to correspond to the creation of the University College.	Fall 2024
5.	Course Rubric Update	<ul style="list-style-type: none">• UNIV 3010 – Foundations of Peer Leadership in the University<ul style="list-style-type: none">○ Updating the course rubric from APSU to UNIV to correspond to the creation of the University College.	Fall 2024
6.	Course Rubric Update	<ul style="list-style-type: none">• UNIV 3020 – Peer Leadership Practicum Experience<ul style="list-style-type: none">○ Updating the course rubric from APSU to UNIV to correspond to the creation of the University College.	Fall 2024
7.	Course Rubric Update	<ul style="list-style-type: none">• UNIV 3030 – The Leadership Project<ul style="list-style-type: none">○ Updating the course rubric from APSU to UNIV to correspond to the creation of the University College.	Fall 2024
8.	Course Rubric Update	<ul style="list-style-type: none">• UNIV 4900 – University Studies Internship<ul style="list-style-type: none">○ Updating the course rubric from APSU to UNIV to correspond to the creation of the University College.	Fall 2024
9.	Course Rubric Update	<ul style="list-style-type: none">• UNIV 4995 – University Studies Capstone<ul style="list-style-type: none">○ Updating the course rubric from APSU to UNIV to correspond to the creation of the University College.	Fall 2024

10.	Course Deletion	<ul style="list-style-type: none"> CRJ 3210 – Medico-Legal Forensics <ul style="list-style-type: none"> This course no longer fits with the faculty expertise in the department. 	Spring 2024
11.	Course Description Update	<ul style="list-style-type: none"> ASTR 1010 – Planetary Astronomy Old Description: The subjects of planetary astronomy such as the planets and their moons, planetary geology, the sun. the origin of the solar system, the tools and methods of astronomy including celestial observation, light and other types of radiation, telescopes and spectroscopy. Laboratory 1011 to be taken concurrently. New Description: Planetary Astronomy covers the tools and methods of astronomy including celestial observation, light, and other types of radiation, telescopes and spectroscopy, as well as the planets and their moons, planetary geology, and the origin of the solar system. Basic mathematical concepts such as number operation, percentage, proportionality, ratio, and graphing are applied throughout the course. 	Fall 2024
12.	Course Description Update	<ul style="list-style-type: none"> ASTR 1011 – Planetary Astronomy Old Description: Laboratory component for ASTR 1010 covering subject of planetary astronomy such as the planets and their moons, planetary geology, the sun, the origin of the solar system, the tools and methods of astronomy including celestial observation, light and other types of radiation, telescopes and spectroscopy. Lecture to be taken concurrently. New Description: Laboratory to accompany ASTR 1010. Laboratory exercises are designed to complement and supplement key concepts covered in ASTR 1010. The ability to use basic mathematical concepts such as number operation, percentage, proportionality, ratio, and graphing is required. 	Fall 2024
13.	Course Description Update	<ul style="list-style-type: none"> ASTR 1020 – Stellar Astronomy Old Description: The subjects of stellar astronomy such as star birth, star life, star death, pulsars, black holes, galaxies, quasars and cosmology, the tools and methods of astronomy including locating and naming stars and constellations, light and other radiation, telescopes and spectroscopy. Laboratory 1021 is to be taken concurrently. New Description: Stellar astronomy covers the tools and methods of astronomy including locating and naming starts and constellations, light and other radiation, telescopes and spectroscopy as well as topics such as the Sun, star birth, star life, star death, pulsars, black holes, galaxies, quasars and cosmology. Basic mathematical concepts such as number operation, percentage, proportionality, ratio, and graphing are applied throughout the course. 	Fall 2024
14.	Course Description Update	<ul style="list-style-type: none"> ASTR 1021 – Stellar Astronomy Lab Old Description: Laboratory component for ASTR 1020 covering subjects of stellar astronomy such as star birth, star life, star death, pulsars, black holes, galaxies, quasars and cosmology; the tools and methods of astronomy including locating and naming stars and constellations, light and other radiation, telescopes and spectroscopy. Lecture to be taken concurrently. New Description: Laboratory to accompany ASTR 1020. Laboratory exercises are designed to complement and supplement key concepts covered in ASTR 1020. The ability to use basic mathematical concepts such as number operation, percentage, proportionality, ratio, and graphing is required. 	Fall 2024

15.	Course Description Update	<ul style="list-style-type: none"> • COUN 5080 – Diagnosis and Psychopathology Old Description: Diagnostic issues relevant to current diagnostic typologies, DSM-IV, will be reviewed. Emphasis will be on etiology from various theoretical perspectives, differential diagnosis and treatment. New Description: Diagnostic issues relevant to current diagnostic typologies, including the most current version of the Diagnostic and Statistical Manual of Mental Disorders (DSM), will be reviewed. Emphasis will be on etiology from various theoretical perspectives, different diagnosis and treatment. 	Fall 2024
16	Course Description Update	<ul style="list-style-type: none"> • CPSY 8501 – Practicum I in Counseling Psychology Old Description: First year supervised clinical training experience in APSU training clinic requiring critical evaluation of observed skill-development. Trainees will work with clients from the community who are seeking services in the training clinic. Observations may occur live or through digital/video recording. Three hours weekly seminar will provide training in HIPAA compliance, use of Partner for Change Outcome Management System (PCOMS), crisis intervention, assessment and intervention with suicidal clients, and other foundational topics. Trainees will be engaged in a range of assessment, diagnosis, treatment planning, intervention, and supervision activities. Trainees will be expected to complete case conceptualizations, treatment plans, progress notes, case summaries, and documentation as appropriate. Weekly clinic hours may vary but should be in the range of 10 to 15 hours. Trainees are expected to complete an average of 500 hours over the course of this year-long practicum. New Description: First year supervised clinical training experience in APSU training clinic requiring critical evaluation of observed skill-development. Trainees will work with clients from the community who are seeking services at the training clinic. Observations may occur live or through digital/video recording. Three-hour weekly seminar will provide training in HIPAA compliance, crisis intervention, assessment and intervention with suicidal clients, and other foundational topics. Trainees will be engaged in a range of assessment, diagnosis, treatment planning, intervention, and supervision activities. Trainees will be expected to complete case conceptualizations, treatment plans, progress notes, case summaries, and documentation as appropriate. Weekly clinic hours may vary but should be in the range of 10-15 hours. Trainees are expected to complete an average of 500 hours over the course of this year long practicum. 	Fall 2024
17.	Course Description Update	<ul style="list-style-type: none"> • CRJ 2400 – Issues in Homeland Security Old Description: An introduction to key concepts related to terrorism, its history, origins, causes, and policies designed to counter it. Major topics include an overview of terrorism as a political weapon; defining terrorism; radicalization; the causes of terrorism; precepts of domestic and international terrorism; and the extremist ideologies and religious foundations of terrorism. Students are also introduced to the policy tools used to prevent and counter terrorism. New Description: An introduction to key concepts, processes, policies, and issues related to homeland security. Major topics include: terrorism 	Fall 2024

		and counterterrorism; border, transportation, and infrastructure security; mass casualty prevention, response, and resiliency; interagency cooperation; major policy debates; and the history and evolution of the Department of Homeland Security.	
18.	Course Description Update	<ul style="list-style-type: none"> MATH 4020 – Geometry for Teachers Old Description: Topics include formal, plane, and solid geometries; tessellations; transformations; measurements; deductive reasoning; constructions with dynamic geometry software and other tools; topology and graph theory. New Description: Topics include informal, plane, and solid geometries; tessellations; transformational geometry; deductive reasoning; constructions and theorem demonstrations with dynamic geometry software and other tools; topology, non-Euclidean geometries and graph theory 	Fall 2024
19.	Course Description Update	<ul style="list-style-type: none"> PHYS 1010 – Concepts: Motion, Heat, and Sound Old Description: Motion, energy, properties of matter, heat, and sound. The approach is conceptual and non-mathematical. The role of physics in the understanding of everyday experiences in our technological society. Laboratory 1011 is to be taken concurrently. New Description: Topics covered include motion, energy, properties of matter, heat, and sound. The course emphasizes the role of physics in the understanding of everyday experiences in our technological society. The approach is conceptual with a minimum of mathematics. Basic mathematical concepts such as number operation, percentage, proportionality, ratio, and graphing are applied throughout the course. 	Fall 2024
20.	Course Description Update	<ul style="list-style-type: none"> PHYS 1011 – Concepts: Motion, Heat, and Sound Lab Old Description: Laboratory component for motion, energy, properties of matter, heat, and sound. The approach is conceptual and non-mathematical. The role of physics in the understanding of everyday experiences in our technological society. New Description: Laboratory to accompany PHYS 1010. Laboratory exercises are designed to complement and supplement key concepts covered in PHYS 1010. The ability to use basic mathematical concepts such as number operation, percentage, proportionality, ratio, and graphing is required. 	Fall 2024
21.	Course Description Update	<ul style="list-style-type: none"> PHYS 1020 – Concepts: Electromagnetism, Light and the Quantum World Old Description: Electricity and magnetism, light, atomic and nuclear physics, and relativity. Physics 1010 is NOT a prerequisite. The approach is conceptual and non-mathematical. The role of physics in the understanding of everyday experiences in our technological society. Laboratory 1021 is to be taken concurrently. New Description: Topics covered include electricity and magnetism, light, atomic and nuclear physics, and relativity. The course emphasizes the role of physics in the understanding of everyday experiences in our technological society. The approach is conceptual with a minimum of mathematics. Basic mathematical concepts such as number operation, percentage, proportionality, ratio, and graphing are applied throughout 	Fall 2024

		the course.	
22.	Course Description Update	<ul style="list-style-type: none"> PHYS 1021 – Concepts: Electromagnetism, Light and the Quantum World Old Description: Laboratory component for electricity and magnetism, light, atomic and nuclear physics, and relativity. Physics 1010/1011 is NOT a prerequisite. The approach is conceptual and non-mathematical. The role of physics in the understanding of everyday experiences in our technological society. New Description: Laboratory to accompany PHYS 1020. Laboratory exercises are designed to complement and supplement key concepts covered in PHYS 1020. The ability to use basic mathematical concepts such as number operation, percentage, proportionality, ratio, and graphing is required. 	Fall 2024
23.	Course Prerequisite Update	<ul style="list-style-type: none"> ASTR 1010 – Planetary Astronomy <ul style="list-style-type: none"> Adding a prerequisite – Deficiencies in reading, writing, and mathematics must be satisfied prior to taking this course. 	Fall 2024
24.	Course Prerequisite Update	<ul style="list-style-type: none"> ASTR 1011 – Planetary Astronomy Lab <ul style="list-style-type: none"> Adding a prerequisite – Deficiencies in reading, writing, and mathematics must be satisfied prior to taking this course. 	Fall 2024

26.	Course Prerequisite Update	<ul style="list-style-type: none"> ASTR 1021 – Stellar Astronomy Lab <ul style="list-style-type: none"> Adding a prerequisite – Deficiencies in reading, writing, and mathematics must be satisfied prior to taking this course. 	Fall 2024
27.	Course Prerequisite Update	<ul style="list-style-type: none"> COUN 5150 Foundations of School Counseling I <ul style="list-style-type: none"> Updating the prerequisites to prerequisite or co-requisite to assist with the utilization of permits. COUN 5400 (Theories of Counseling) and COUN 5410 (Counseling Techniques) will now be able to be taken prior to or with COUN 5150 (Foundations of School Counseling I) 	Fall 2024
28.	Course Prerequisite Update	<ul style="list-style-type: none"> MATH 4020 – Geometry for Teachers <ul style="list-style-type: none"> Updating the prerequisite from MATH 1420 (Structures of Mathematical Systems II) or MATH 1910 (Calculus I) to MATH 1410 (Structures of Mathematical Systems I) and MATH 1420 (Structures of Mathematical Systems II) or MATH 1910 (Calculus I) 	Fall 2024
29.	Course Prerequisite Update	<ul style="list-style-type: none"> MATH 5140 – Financial Derivatives <ul style="list-style-type: none"> Removing the prerequisite of MATH 5130 (Financial Mathematics) 	Fall 2024
30.	Course Prerequisite Update	<ul style="list-style-type: none"> MATH 5260 – Stochastic Processes 	Fall 2024

		<ul style="list-style-type: none"> ○ Removing the prerequisite of MATH 5240 (Probability) or STAT 5240 (Probability) 	
31.	Course Prerequisite Update	<ul style="list-style-type: none"> ● MGT 3410 – Productions Operations Management ○ Removing the prerequisite of MGT 3310 (Data Analytics and Statistics) 	Fall 2024
32.	Course Prerequisite Update	<ul style="list-style-type: none"> ● PHYS 1010 – Concepts: Motion, Heat, and Sound ○ Adding a prerequisite – Deficiencies in reading, writing, and mathematics must be satisfied prior to taking this course. 	Fall 2024
33.	Course Prerequisite Update	<ul style="list-style-type: none"> ● PHYS 1011 – Concepts Lab: Motion, Heat, and Sound ○ Adding a prerequisite – Deficiencies in reading, writing, and mathematics must be satisfied prior to taking this course. 	Fall 2024
34.	Course Prerequisite Update	<ul style="list-style-type: none"> ● PHYS 1020 – Concepts: Electromagnetism, Light, and the Quantum World ○ Adding a prerequisite – Deficiencies in reading, writing, and mathematics must be satisfied prior to taking this course. 	Fall 2024
35.	Course Prerequisite Update	<ul style="list-style-type: none"> ● PHYS 1021 – Concepts Lab: Electromagnetism, Light, and the Quantum World ○ Adding a prerequisite – Deficiencies in reading, writing, and mathematics must be satisfied prior to taking this course. 	Fall 2024
36.	Course Prerequisite Update	<ul style="list-style-type: none"> ● STAT 5260 – Stochastic Processes ○ Removing the prerequisite of MATH 5240 (Probability) or STAT 5240 (Probability) 	Fall 2024
37.	Course Prerequisite Update	<ul style="list-style-type: none"> ● SOC 3770 – Analysis and Assessment ○ Removing the prerequisite of MATH 1530 (Elements of Statistics) 	Spring 2024
38.	Course Hours Update	<ul style="list-style-type: none"> ● RLTN 4032 – Clinical Education III ○ Updating the course credit hours to 3. A formula of one credit hour per 8-hour clinical day is utilized and accepted by JRCERT, therefore, for a student to attend an all-day clinic, the course credit hours should be 3. 	Summer 2024
39.	Course Hours Update	<ul style="list-style-type: none"> ● EDUC 2100 – Foundations of Education ○ Additional content has been added to the course and due to this the credit hours should also increase from 2 to 3 semester credit hours. 	Fall 2024

1-39 - No discussion or question. **Unanimously approved**

Action Agenda Item: All items require final approval by the Provost/SVP Academic Affairs

College of Arts and Letters					
#	Prog/Dept	Presented by	Action	Description	Implementation Date
1.	African American Studies	Eboné Amos	<ul style="list-style-type: none"> • Undergraduate program modification - Updating the existing curriculum for African American Studies minor as it currently does not reflect the current state of the discipline and many of these courses have not been taught in many years. 	<p>Removing DIVR 4020 (Capstone Seminar in Social Justice); Three hours of any WGST course; AAST 2500 (Africana Women Across Cultures); AAST 300B and 300C (Selected Topics); AAST 3200 (Study Abroad in Ghana, West Africa); AAST 4050 (The Social Meaning of Race)</p> <p>Adding AAST 2250 (African American Expressive Culture); WGST 2050 (Intro to Women's and Gender Studies); AAST 3020 (Seminar in African American Studies); COMM 4470 (Race, Gender, and Mass Media); DANC 1500 (Jazz Dance-Foundations); DANC 1900 (Tap Dance - Foundations); DANC 3500 (Jazz Dance-Intermediate); DANC 3700 (Hip Hop Dance-Intermediate); DANC 3900 (Tap Dance-Intermediate); DANC 4710 (Hip Hop Dance Pre-Professional); DANC 4550 (Jazz Dance Pre-Professional); DANC 4900 (Tap Dance Pre-Professional); HIST 4665 (History of the Civil Rights Movement); WGST 2060 (Intro to LGBTQ Studies); AAST 3300 (Intro to Black Theatre and Performance)</p>	Fall 2024

Eboné Amos explained that several of the AAST courses were outdated and had not been taught in many years. They were updating the content and requirements to fit her style of teaching the minor. **#1 Unanimously approved**

College of Behavioral Health Sciences					
#	Prog/Dept	Presented by	Action	Description	Implementation Date
1.	Criminal Justice	Scott Culhane	Undergraduate New Course	<ul style="list-style-type: none"> • CRJ 3500 – International Courts and Justice <ul style="list-style-type: none"> ○ This course focuses on the historical development and emergence of international law and criminal courts and tribunals. Students will examine the unique challenges of establishing international criminal law and international court systems, how and why such institutions were created, and the need for an international criminal justice community. 	Fall 2024

2.	Criminal Justice	Scott Culhane	Undergraduate New Course	<ul style="list-style-type: none"> • CRJ 4320 – Juvenile Justice <ul style="list-style-type: none"> ○ This Juvenile Justice course provides an in-depth exploration of the juvenile justice system, focusing on its theoretical foundations, practical applications, and policy implications. Students will examine the unique aspects of the juvenile justice process, its challenges, and the evolving strategies for preventing, treating, and/or punishing “delinquent” behavior. 	Fall 2024
----	------------------	---------------	--------------------------	--	-----------

Scott Culhane explained they were two new courses which will go into specific baskets that students must select courses from for the major. They focus on content not previously covered and are in the wheelhouse of newer faculty.

#1 and 2 Unanimously approved

3.	Criminal Justice	Scott Culhane	Undergraduate Program Modification	<ul style="list-style-type: none"> • Criminal Justice, BS <ul style="list-style-type: none"> ○ Adding electives to the current options: CRJ 3300 (Ethics in Criminal Justice) and CRJ 4011 (Issues in Criminal Justice) to the Processes and Institutions electives; CRJ 3500 (International Course and Justice) and CRJ 4320 (Juvenile Justice) to the Courts and Law electives; CRJ 4050 (Criminal Profiling) and CRJ (Criminal Justice in Popular Culture) to the Crime and Deviance elective. 	Fall 2024
----	------------------	---------------	------------------------------------	--	-----------

4.	Criminal Justice	Scott Culhane	Undergraduate Program Modification	<ul style="list-style-type: none"> • Homeland Security Concentration in BS Criminal Justice <ul style="list-style-type: none"> ○ Adding electives to the current options: CRJ 3300 (Ethics in Criminal Justice) and CRJ 4011 (Issues in Criminal Justice) to the Processes and Institutions electives; CRJ 3500 (International Course and Justice) and CRJ 4320 (Juvenile Justice) to the Courts and Law electives; CRJ 4050 (Criminal Profiling) and CRJ (Criminal Justice in Popular Culture) to the Crime and Deviance elective. 	Fall 2024
----	------------------	---------------	------------------------------------	--	-----------

Scott Culhane grouped number 3 and 4 and explained that there are several courses that were straight electives which are not being moved into these baskets which require students to select courses. This will assist with cleaning up items for the 2-year rotation. Motion to approve. No discussion, no comments. **#3 and 4 Unanimously approved.**

Department of Health and Human Performance

#	Prog/Dept	Presented by	Action	Description	Implementation Date
1.	HHP	Tim Leszczak	Undergraduate New Course	<ul style="list-style-type: none"> • CSDI 3085 – American Sign Language II 	Spring 2024

				<ul style="list-style-type: none"> ○ Students with mastery of ASL fundamentals will expand practical skills in ASL and acquire knowledge for successful interactions within the Deaf Community. <p>Notes- Tim Leszczak explained CSDI 3085 (American Sign Language II) was a new course created to assist students with the skills they needed in American Sign Language for the major. This course would be a recommended elective and would also be open to all students on campus.</p>	
2.	HHP	Tim Leszczak	Undergraduate New Course	<ul style="list-style-type: none"> ● HHP 2060 – Peer Health Education <ul style="list-style-type: none"> ○ This course prepares student to inform, educate, intervene, and assist their campus peers to make healthy lifestyle choices. Upon completion of the course and Certified Peer Health Educator (CPE) exam, students become a CPE, and are eligible to conduct peer education programming on campus through campus wellness initiatives. Students meet once a week for 2 hours in class, and would complete 15 hours of on-campus volunteer service. 	Spring 2024
3.	HHP	Tim Leszczak	Undergraduate New Course	<ul style="list-style-type: none"> ● HHP 3025 – Emerging Global Health Issues <ul style="list-style-type: none"> ○ This course will examine global health issues using the determinants of health with a focus on the burden of diseases. Students will look at social, economic, political, and environmental factors that influence health disparities on a global level. This course provides students the opportunity to learn about global health organizations and the impact of global health interventions. 	
<p>Tim Leszczak grouped items 2 and 3 and explained that of these new courses would be going into the Extended Elective area of coursework where students select up to 12 hours of coursework from electives. HHP 2060 (Peer Health Education) allows students to become a Certified Peer Health Educator and become more confident in the field. HHP 3025 (Emerging Global Health Issues) expands into Global Health and interventions used. Faculty who were recently hired have expertise in these areas and therefore the department is seeking to add these courses. #1 Unanimously approved ; #2 and 3 Unanimously approved.</p>					

4.	HHP	Tim Leszczak	Undergraduate Program Modification	<ul style="list-style-type: none"> • Communication Sciences and Disorders Concentration in BS Health and Human Performance <ul style="list-style-type: none"> ○ Reducing the number of concentration hours from 48 to 45 by removing CSDI 4050 (Interprofessional Training) and CSDI 4060 (Language and Literacy) <p>Notes - Tim Leszczak explained the program was being updated based on guidance from the accreditor. The concentration is being reduced by 3 credit hours. Motion to approve. No discussion, no comments.</p>	Fall 2024
----	-----	--------------	------------------------------------	--	-----------

4 Unanimously approved.

5.	HHP	Tim Leszczak	Undergraduate Program Modification	<ul style="list-style-type: none"> • Public Health Concentration in BS Health and Human Performance <ul style="list-style-type: none"> ○ Adding one required course of HHP 4801 (CHES Exam Preparation) ○ Adding multiple courses to the guided elective option : COMM 4444 (Cultural Content in Communication); COMM 4510 (Communication and Public Opinion); HHP 2060 (Peer Health Education); HHP 3025 (Emerging Global Health Issues); SOC 2900 (Marriage and the Family); SOC 3050 (Race and Ethnicity in a Multicultural Society); SOC 3060 (Contemporary Issues in the Family); SOC 3070 (Families Across Cultures); SOC 3080 (Gender and Sexualities); SOC 3150 (Social Psychology of Everyday Life); SOC 3250 (Social Institutions); SOC 3300 (Power, Privilege, and Global Inequality); SOC 3750 (Population Dynamics) 	Fall 2024
----	-----	--------------	------------------------------------	--	-----------

Tim Leszczak explained that HHP 2060 (Peer Health Education) and HHP 3025 (Emerging Global Health Issues) as well as a few other courses from different disciplines are being added into the Extended Electives option where students will complete up to 12 credit hours of coursework. Additionally, the department is removing a one credit hour course called CHES Exam Preparation course and making that a concentration requirement. This is due to wanting students to sit for the exam and be prepared to have a credential upon graduate from the program. **#5 Unanimously approved**

College of Business

#	Prog/Dept	Presented by	Action	Description	Implementation Date
1.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Undergraduate New Course	<ul style="list-style-type: none"> • FIN 3630 – Real Estate Development <ul style="list-style-type: none"> ○ This course introduces and analyzes the various phases of real estate development. The curriculum includes the identification and analysis of different phases of real estate development, the practical application or market analysis and site selection techniques, comprehensive analysis of key concepts and metrics in real estate underwriting and investments; the application of planning, design, and construction management techniques to development projects. The curriculum also explores the recent trends and issues in real estate development. 	Spring 2024
2.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Undergraduate New Course	<ul style="list-style-type: none"> • FIN 4220 – Financial Institutions Seminar <ul style="list-style-type: none"> ○ This seminar style course consists of a weekly blend of lectures/discussions from financial services professionals in banking and real estate, and select faculty members on a case-by-case basis. These weekly discussions will focus primarily on current issues, and best practices in the financial services industry. All students are required to submit weekly reports, and complete a term paper summarizing their understanding of the industry from various speakers (including faculty participants) throughout the semester. 	Spring 2024
3.	Accounting, Finance, and Economics	Don Nyonna/ Emily lean	Undergraduate New Course	<ul style="list-style-type: none"> • FIN 4000 – Bank Management <ul style="list-style-type: none"> ○ The course studies bank management and bank regulation. It examines the operations and management policies of commercial banks, including balance sheet management (liquidity, liabilities, spread management, and investment management), capital adequacy, cost of funds, bank profitability, planning and management systems, and the regulatory environment. It also touches on the risk structure of credit for commercial and consumer clients. 	Fall 2024
4.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Undergraduate Program Modification	<ul style="list-style-type: none"> • Finance, BBA <ul style="list-style-type: none"> ○ Updating the major core requirements so they are consistent across the major and three corresponding concentration options. 	Fall 2024
5.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Undergraduate Program	<ul style="list-style-type: none"> • Economics Concentration in BBA Finance <ul style="list-style-type: none"> ○ Updating the major core requirements so they are consistent across the major and three corresponding 	Fall 2024

			Modification	concentration options.	
6.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Undergraduate Program Modification	<ul style="list-style-type: none"> • Banking Concentration in BBA Finance <ul style="list-style-type: none"> ○ The concentration in Banking will modernize the curriculum and develop marketable skills for students. The program will include the BBA core that assists students with acquiring general knowledge in business. In addition, the Banking concentration will include courses in Money and Banking as well as Bank Management, these courses will enhance students' skills for jobs in Banking. 	Fall 2024
7.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Undergraduate Program Modification	<ul style="list-style-type: none"> • Real Estate Concentration in BBA Finance <ul style="list-style-type: none"> ○ The concentration in Real Estate will modernize the curriculum and develop marketable skills for students. The program will include the BBA core that assists student with acquiring general knowledge in business. In addition, the Real Estate concentration includes courses in real estate finance and real estate development, these courses will enhance students' skills for jobs in real estate. 	Fall 2024
<p>Don Nyonna combined the concentrations with the new courses (agenda numbers 1-7) and explained that an advisory board suggested the addition of the Real Estate and Banking concentrations to enhance the Finance major and make it easier for students to gain employment upon graduation. In order to support the new concentration three new courses are being added. Real Estate Development, Financial Institutions Seminar, and Bank Management. Motion to approve. No questions or discussions. # 1-7 Unanimously approved.</p>					
8.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Graduate New Course	<ul style="list-style-type: none"> • ACCT 5020 – Managerial Accounting <ul style="list-style-type: none"> ○ This course develops financial analysis skills useful in business decision-making, the ability to analyze accounting information useful for monitoring efficiency, quality, and timeliness, determine appropriate prices and costing of products and services, and the development of operation budgets. Principles, concepts, and tools in managerial accounting, including product costing, budgeting, decision making tools, performance measurement, financial accounting concepts, financial statement analysis tools, reporting responsibilities of management, and analysis of the impact of management's historical decisions. 	Fall 2024
9.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Graduate New Course	<ul style="list-style-type: none"> • ECON 5220 – Advanced Managerial Economics <ul style="list-style-type: none"> ○ This course will build on a traditional basis of microeconomics theory through the case method and research projects. Case application will bring microeconomic analysis into the realm of managerial decision making. Focus will be placed on the applications of economic theory for making rational management analysis and decisions as well as the guiding principles undergirding demand, supply, cost theories, and their relevance to business strategic pricing and output decisions. Additional topics may 	Fall 2024

				include, consumer theory, theory of the firm, the role of government in business, international and global business, and financial investment.	
10.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Graduate New Course	<ul style="list-style-type: none"> • FIN 5020 – Financial Management <ul style="list-style-type: none"> ○ This course will focus on the analysis of the capital structure, dividend policy, and working capital policy of the firm. Additional topics include but are not limited to the manager’s role in corporate planning, risk measurement, valuation, cost of capital, analytical tools used for the acquisition and allocation of funds evaluation capital investment proposals, performance cash flow analysis, and applying the capital asset pricing model. Instruction will include computer models and appropriate financial software. 	Fall 2024
11.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Graduate New Course	<ul style="list-style-type: none"> • BUS 5310 – Data Analysis <ul style="list-style-type: none"> ○ Students will explore contemporary methodologies and tools for analyzing both structured and unstructured data, with an emphasis on practical applications across various business sectors. Topics include descriptive, diagnostic, and predictive analytics, data modeling and visualization, data-driven value creation, and operational and strategic decision-making as well as risk management. 	Fall 2024
12.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Graduate New Course	<ul style="list-style-type: none"> • BUS 5810 – MBA Capstone <ul style="list-style-type: none"> ○ This capstone course integrates topics contained in courses comprising all of the functions of business. Discussions originate from studying the development and implementation of corporate strategy amid changing global environmental forces at both the general and competitive level 	
13.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Graduate New Course	<ul style="list-style-type: none"> • MKT 5010 – Marketing Management <ul style="list-style-type: none"> ○ This course covers the theories, frameworks, concepts, and tools that identify the core elements that drive consumers and organizations to purchase/source products and services and takes an analytical, managerial approach to the marketing activities of a business enterprise. Problem solving and decision making in marketing environments is emphasized. 	Fall 2024
14.	Accounting, Finance, and Economics	Don Nyonna/ Emily Lean	Graduate Program Modification	<ul style="list-style-type: none"> • Management, MBA <ul style="list-style-type: none"> ○ APSU has received THEC approval to move forward with the MBA in Management. The College of Business will transition from the MS to the MBA in Fall 2024. 	Fall 2024

Emily Lean grouped 8-14 and explained that APSU was essentially making the MS in Management into the MBA and the graduate level courses were created to assist with the MBA content. Maria Cronley also explained that this process had been approved by THEC which was slightly out of the typical order but due to the nature of the program and the

guidance given APSU for the program to be approved and no objections were anticipated. Motion to approve. No questions or comments. # 8-14 Unanimously approved.					
15	Management and Marketing	Emily Lean	Undergraduate New Course	<ul style="list-style-type: none"> • MGT 4005 – Mastering ChatGPT: A Business Student’s Guide to Leveraging AI <ul style="list-style-type: none"> ○ Explore the frontier of AI in business with ‘Mastering ChatGPT’. Dive deep into strategic decision-making, enhanced by AI insights, while honing critical thinking skills. Navigate the complexities of ethical dilemmas in AI-driven business scenarios, preparing for a future where technology and morality intertwine. 	Fall 2024
16.	Management and Marketing	Emily Lean	Undergraduate New Course	MKT 3720 – Digital Marketing Students will learn theoretical frameworks and field practices in digital marketing. Students will learn how to understand and analyze digital marketing issues and problems in the real business world. Students will experience tasks performed in the digital marketing field, such as buyer persona creation, website analysis, and blog post writing.

1.	Dept. of Teaching and Learning	Angela Stone	Undergraduate New Course	RDG 4005 – K-3 Foundational Literacy Skills This course introduces the foundational skills of early literacy instruction for teaching elementary K-3 students and analysis of literacy assessment data to determine appropriate instructional decisions. Research on literacy from the National Reading Panel and the science of reading inform the framework of this course as teach candidates learn literacy foundational skills. – phonological awareness, phonics, fluency and vocabulary as well as spelling, writing, and English Language Arts content and methods of teaching. Pre-service teacher candidates will apply and integrate this knowledge in	Summer 2024

				future coursework in their education program and future classrooms.	
--	--	--	--	---	--

Notes - Benita Bruster explained the RDG 4005 (K-3 Foundational Literacy Skills) course was being proposed in direct relation to a change in the literacy and phonics requirement for licensure by the State of Tennessee. There were some missing pieces with our phonics area and therefore this course has been proposed to meet the entire standard for licensure. The plan is to utilize the RDG course to replace the LING requirements in the following concentrations: PreK-3, K-5 Licensure Program and. K-8 Interventionist concentration.

Margaret Rennerfeldt asked if the removal of the LING course was due to the number of credit hours for these EDUC programs? Yes, because the programs are all over the hours and there was no way to keep the LING requirements and add the RDG course.

Angela Stone explained that the College of Education looked at all the licensure requirements for the Reading portion and the LING course was only meeting one of the literacy standards outlined in the state requirements.

Wes Atkinson shared that the partnership between EDUC and LING expresses the values and vision of the university and they think it should remain in the program.

Benita – responded that they valued the LING course and faculty and intend to ensure that all the information in the LING course is a major component of the course. Maybe a different method but information from that course would still be contained with the new RDG 4005 course.

Charla Major asked if it was not possible to work with Language and Literature to do something with the LING course. Benita – this would be nice but their hours as so high because of the licensure that it makes it difficult.

Manisha Gupte also voiced the same concern as to if the LING course could be maintained in the Education programs even as an elective.

Maria Cronley chimed in that it was her understanding that while collaboration across departments was great when it was able to be done, there are times that this is not able to happen. Furthermore she stated that it seemed Education had looked at the options and based on what the state was requiring it was not possible to retain the LING course and add the RDG course due to the already large number of credit hours required for the program.

Buzz Hoon asked as a final question if there would be any possibility of reworking the LING courses as they are to meet the standards for licensure as outlined by the State of Tennessee. Benita explained that based on how this was written she did not see that as an option at this time because of the different in perspectives on the for how these requirements are taught.

Motion to approve. **Voting 11 – Yes and 5 No. Motion passed.**

1.	Univ. Studies	Allen Barger	Undergraduate New Course	<ul style="list-style-type: none"> ● UNIV 1010 – University Success and Foundations of Learning <ul style="list-style-type: none"> ○ UNIV 1010 is an interdisciplinary course which provides students with a foundation for success. Emphasis is placed on student engagement, support services, library literacy, financial literacy, academic planning and establishing a foundation for academic excellence at APSU. This course is required for all opportunity admit students. Students must register and remain enrolled in UNIV 1010 until a grade of “C” is earned. 	Fall 2024
2.	Univ. Studies	Allen Barger	Undergraduate New Course	<ul style="list-style-type: none"> ● UNIV 1200 – University Success for Transfer Students <ul style="list-style-type: none"> ○ UNIV 1200 is an interdisciplinary course that provides transfer students with a foundation for success and sense of belonging at APSU. This course will emphasize the importance of student engagement, student services, library literacy, academic strategies for success, and utilization of campus technology to understand APSU culture. Students enrolled in this course will gain useful information about self-advocacy and holistic wellness that will aid them in their transition to Austin Peay State University. 	Fall 2024
3.	Univ. Studies	Allen Barger	Undergraduate New Course	<ul style="list-style-type: none"> ● UNIV 2100 – University Success: Preparing for the World of Work <ul style="list-style-type: none"> ○ This course is designed to help students understand the connection between academic programs and careers as well as understand the soft skill for any career. The activities and assignments are designed to 	Fall 2024

				facilitate mapping academic majors to career choices, and to expand understanding of the relationship between education and the world of work. Emphasis will be placed on self-awareness, career exploration, self-marketing techniques, and development of job/internship search skills and post-graduate opportunities. This course supports the university's overall mission to prepare students for successful careers and post-graduate opportunities.	
--	--	--	--	---	--

Allen Barger explained that the UNIV 1010 and 1200 are new versions of the APSU 1000. These courses are to be offered to specific populations so they are better able to integrate into the APSU community. The 1200 is specific to transfer students who are seeking for a smooth integration to the APSU community and to also acclimate themselves to the software and processes. This course is not required and purely optional. Jackie Vogel asked why 1200 was selected and not another number like 1020 or 1030? Loretta explained that they were not developed in sequence or at the same time. **Unanimously approved.**

4.	Univ. Studies	Allen Barger	Undergraduate Program Modification	<ul style="list-style-type: none"> • Survey of Training and Development Concentration in BS University Studies <ul style="list-style-type: none"> ○ Changing the name of the concentration from Survey of Education (Non-Licensure) due to the establishment of that concentration within the College of Education. ○ Adding some additional electives to the concentration. 	Fall 2024
5.	Univ. Studies	Allen Barger	Undergraduate Program Modification	<ul style="list-style-type: none"> • Survey of Organizational Administration and Supervision Concentration in BS University Studies <ul style="list-style-type: none"> ○ Restructuring the requirements so they appear better in Degree Works and require less manual work to resolve issues. 	Fall 2024
6.	Univ. Studies	Allen Barger	Undergraduate Program Modification	<ul style="list-style-type: none"> • Survey of Public Service Concentration in BS University Studies <ul style="list-style-type: none"> ○ Creating a new concentration which will assist with recruiting potential students who have completed EMS/EMT programs, police academies, or fire academies. 	Fall 2024
7.	Univ. Studies	Allen Barger	Undergraduate Program Modification	<ul style="list-style-type: none"> • Military Operations Concentration in BS University Studies <ul style="list-style-type: none"> ○ This is a new concentration for the University Studies major necessitated by changes in Financial Aid regulations that will not cover minors unless required and built into the major. This new regulation makes it difficult for Green to Gold candidates that have numerous credits transferring in. This concentration will be a final option for those students. 	Fall 2024

Allen Barger explained the College of Education had recently established their own concentration in Education Non-Licensure and Dean Chandler had reached out to have some modifications made to the concentration name so

students did not become confused. Based on this change, there were also some new courses added which were specific to Training and Development. This concentration will be used for non-education majors and those who are seeking only degree completion, but the University College is committed to making sure students go through the College of Education first. After the motion to approve, several comments were made and concerns raised. Bill Rayburn explained that several individuals had reached out to him with concerns for the courses utilized in each of the University Studied BS concentrations. Further, these individuals were concerned that there had been no discussion with the chairs/faculty in those departments for courses being utilized as part of the University Studies major. There was additional concern regarding appropriate substitutions being made and who would be responsible for making these decisions, University College or the course department/college home. It was suggested that perhaps it would be appropriate for the University College to meet with or send representative to meet with each college dean and chairs for their input on these concentrations (4,5,6,7). Maria Cronley stated that these were all valid concerns but her understanding was prior to the creation of these concentration a committee had been formed to work with areas across campus, not only develop the concentrations but also approve/suggest relevant courses for these concentrations. Additionally, the University College was created for this program to have a home and oversight. Loretta Griffy again stated the changes to this concentration (Survey of Training and Development) was done specifically at the request of Dean Chandler. If there is opposition to courses listed, please let them know what they are and they can take them out. Further discussion ensued regarding an amendment to items 4-7 as proposed. Loretta Griffy explained that for item 5 the department was consulted, item 6 was not specific to a department and 7 the deans and others were consulted and Dean Williams specifically asked for this to move forward. Scott Culhane adamantly objected that number 6 would directly impact Criminal Justice as they recruited those out of correctional or police academies and he was very concerned this was the first he was hearing of the concentration. Not only were the courses wrong for this area but it would impact the Criminal Justice major. Nicholas Coleman state that we need an understanding that specific substitutions would not originate from the University College.

Loretta Griffy explained that very few substitutions are ever processed for these students. Maria Cronley reminded the committee that students must have earned at least 60 credit hours before they are eligible to declare the University Studies major hours before they are even eligible for this program. Maria Cronley also explained the University Studies major was Interdisciplinary by nature. Furthermore, she suggested that a motion be made to table these proposals until a future meeting. **Motion to table. Unanimously approved.**
